

Search Engine history

Mason Reep

The history of the search engine

- The search engine has had many forms in the past, the first being created in 1990. At least one search engine was released every year without missing one from 1990-2017

How do search engines work

- Search engines take you to a website or information that you searched for using key words and links to the selected site.

What was the first ever version of the search engine?

- Archie was the first ever search engine, it was used for searching content, instead of users.

What is the newest search engine?

- There are many search engines now, but the four most common are, Google chrome, Microsoft edge, Firefox, and safari on MAC.

What is the best search engine?

- The answer to this question depends on the needs of the user, every engine is a little different but still have a lot of similarities.

What is the most popular?

- There are very many search engines, the default on all windows computers is Microsoft edge, yet google is the most popular with over 75% of users using their engine.

What is the dark web?

- Also known as the deep web, it is a type of search engine where everything is secret and hidden, the deep web could be a very dangerous place, the deep web has everything from drugs being sold, to hitmen, to deadly viruses, more commonly used to buy illegal substances and other objects.

What can you find on the web

- The web is ever expanding, and you can find almost anything, including helpful information, games, calculators, and much more, the normal web is much cleaner than the dark web, but still the web is not completely safe, but much safer than the dark web.

Round up

- In the almost 31 years of search engines, a lot has changed, the internet and web exploded and became the primary way to find information, to now being our primary way of schooling in 2020-2021
- The web has seen dark times and light times, for being only 31 years old, it has seen so much evolving that it has become a part of everyones life, and it is much easier to learn information now than ever before.

Sources

- Surprisingly, this only took one source
